

*Excellence in Industrial & Commercial Services*

**VP/PROJECT MANAGER**

## **CARROLL KING**

My career started in 1964 serving 20+ years in the Arkansas Air National Guard as an aircraft crew chief. In 1977, I decided to take the skills I acquired through my military training and apply them to the general contracting/construction market. For more than 40 years, I catered to the commercial and industrial markets focusing on both remodel and new ground up construction projects.

Serving as a select general contractor for the Fort Chaffee Redevelopment Authority, I have executed numerous projects ranging from HVAC retros to structural rebuilds. My management skills have also been used to satisfy projects at VA hospitals abroad.

Most recently, I have been proud to manage and lead construction teams/subcontractors in building a museum and memorials honoring fallen servicemen at Fort Chaffee.

## **QUALIFICATIONS**
